SUMMARY

Full-stack software engineer who owns features end-to-end — from React/TypeScript interfaces through Node.js APIs to PostgreSQL/MySQL data layers and cloud deployment. Led the full-stack rebuild of a villa property management system (React, TypeScript, Node.js, PostgreSQL) and the end-to-end redevelopment of a legacy enterprise platform into a modern React.js/Node.js application, improving performance. Comfortable across the whole stack — UI, API, database, authentication and Azure/cloud deployment — and collaborating directly with designers, founders and non-technical stakeholders in fast-moving environments.

SKILLS

- **Languages & Frameworks:** JavaScript (ES6+), TypeScript, React.js, Node.js, HTML, CSS, JSON, Python, PHP, C#
- **Frontend & UI:** HTML5, CSS3, Tailwind CSS, component-based UI development, responsive design, cross-browser compatibility, on-page SEO
- **Backend & Databases:** Node.js, RESTful API design, MySQL & PostgreSQL (query writing & optimisation), legacy system integration, data pipelines
- **Cloud & Systems:** Microsoft Azure, Linux, SSH, Git & GitHub (branching, merging, conflict resolution)
- **Security:** JWT, SSO, Microsoft MFA, role-based access control
- **Agentic Development:** GitHub Copilot, Cursor, Claude
- **E-commerce & CMS:** Shopify (Liquid, theme & section development), WordPress (custom themes & plugins), responsive design, on-page SEO
- **Domain:** Full-stack delivery, legacy system modernisation, API composition, IoT/monitoring systems, LLM-based tooling, e-commerce development

PROFESSIONAL EXPERIENCE

Full-Stack Engineer and Field Engineer — RWDI Australia

Mar 2025 – April 2026

Platform Engineering (Smartadata.io)

- **Analysed and read a legacy Drupal/PHP codebase** to diagnose bugs and design its replacement, then led end-to-end **redemption into a modern React.js and Node.js application** — covering frontend product development, backend services, internal APIs, authentication, Azure deployment, and CI/CD pipelines (GitHub Actions) for automated build, test, and release — improving performance by over 90%
- **Worked within an Agile structure** — sprint planning, daily standups, and retrospectives — to deliver the platform rebuild in iterative releases, supporting the compression of a projected 12-month rebuild to 8 months
- **Leveraged AI-assisted coding tools** (GitHub Copilot, Cursor, Claude) throughout the full development lifecycle — including code generation, debugging, explaining and analysing legacy code, writing test cases, and producing technical documentation — compressing a projected 12-month platform rebuild to 8 months while maintaining production-quality code and security standards
- **Designed and built RESTful APIs** and optimised complex MySQL queries to support high-frequency data ingestion and retrieval across connected systems
- **Implemented secure authentication and access control (JWT, SSO, Microsoft MFA)** and developed role-based access control with audit logging

Field Engineering

- **Diagnosed and resolved issues across software, hardware, and data pipelines** for live monitoring systems using Linux and Python scripts to validate data integrity
- **Troubleshoot environmental monitoring devices (noise, vibration, PM2.5)** — identifying root causes across networking, hardware, and backend systems
- **Deployed and maintained software on IoT-based PCB systems** for on-site environmental monitoring across NSW and the ACT

Full-Stack Web Developer — Phuket Greenland Property (Remote)

Jun 2024 – Mar 2025

- **Led end-to-end development** of a full-stack villa property management system (React, TypeScript, Node.js, PostgreSQL) — centralising properties, clients, leases, and invoice generation that previously relied on manual Excel/Word processes
- **Built a bilingual (EN/TH) public villa listing and detail website** — React 18, Vite, TypeScript, Tailwind CSS and shadcn/ui — with image galleries, on-page SEO, and an inquiry form, replacing static marketing content with a responsive, SEO-friendly site
- **Built REST APIs, role-based access control, JWT authentication, and PDF invoice/statement export**; deployed across Railway and Cloudflare in an npm-workspaces monorepo

Web Developer — COG Branding, Australia

Oct 2023 – Mar 2024

- **Built and customised Shopify storefronts for Australian business clients** — writing Liquid template code for custom theme sections, product pages, collection pages and landing pages, and maintaining clean, organised, scalable code across builds
- **Designed and developed parallel WordPress and React.js solutions alongside Shopify builds**, including custom WordPress themes and plugins, to give clients flexibility across multiple platforms
- **Diagnosed and resolved front-end bugs**, layout issues and cross-browser inconsistencies, and optimised site performance, mobile responsiveness and on-page SEO to improve usability and customer experience
- **Collaborated with designers, marketers and project managers to translate creative briefs into functional**, client-ready Shopify and WordPress builds, communicating technical constraints in plain language for non-technical stakeholders

RELEVANT PROJECTS

Application development, Australia

Jan 2023 - Dec 2023

Brain Computer Interface, Faculty of Engineering, UNSW

- Developed a video game in **Unity (C#)** integrating BCI hardware (Emotiv Insight 2.0), implementing custom scripts for input handling, game state, and data logging — exploring AI-adjacent human-computer interaction.
- Analysed user interaction and performance data, producing a detailed report on BCI controls and user cognitive responses

Web Front-End developer, Australia

March 2023 - April 2023

ReactJS: BigBrain, Faculty of Engineering, UNSW

- Built a full React.js quiz platform with real-time data retrieval, component state management, and a 12-week delivery schedule managed via Git

EDUCATION

Bachelor of Engineering (Computer Engineering)

Sep 2020 - Feb 2024

University of New South Wales

(Honours Class 2 Division 2)

Bachelor of Engineering (Electrical Engineering)

Feb 2018 - Aug 2020

Thammasat University
